Applicant's amendment filed on June 30, 2005 has overcome the grounds of rejection previously presented. As such, claims 1 and 2 are now deemed allowable over the prior art of record. Further, newly added claims 16-29 are deemed allowable over the prior art of record. The reasons for allowance of the above claims is substantially similar to that as indicated for claim 3 in the Office Action mailed on March 30, 2005.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 12-15 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

In regards to claim 12, Examiner notes the limitations of an electronic camera comprising:

an audio regeneration device which regenerates non-ambient sound; and
audio regeneration data which at least indicates where non-ambient sound during audio regeneration is stored within the audio regeneration device.

Examiner notes that there is no support in the specification for the electronic camera to have an audio regeneration device that regenerates non-ambient sound. Rather, the audio

Art Unit: 2615

regeneration device of the electronic camera, namely elements 42, 44, and 58-68 of Fig. 1, only regenerates ambient sound. In particular, in paragraphs 0030-0031 it is disclosed that ambient sound input through microphones 28 is recorded onto the recording medium 42. In paragraph 0035, it is disclosed that the audio regeneration device of the electronic camera outputs the audio data that is recorded on the recording medium 42. There is no disclosure of recording non-ambient audio data to the recording medium 42. As such, the audio regeneration device of the electronic camera does not regenerate non-ambient sound. Further since no non-ambient sound is recorded in recording medium 42, there is no disclosure of audio regeneration data which indicates where non-ambient sound is stored within the audio regeneration device.

Claim 13 depends from claim 12.

In regards to claim 14 a similar problem as that outlined in the rejection of claim 12 is present.

Claim 15 depends from claim 14.

Examiner suggests deleting the limitation of "an audio regeneration device which regenerates non-ambient sound" in both of claims 12 and 14.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
